Smart Reusable Face Mask designed to help you protect against **COVID-19** and **BEYOND!**

 **GLASK**[®]

INNOVATIVE AND REUSABLE FACE MASK FILLED WITH FEATURES

3Dman[®]

GLASK is an **INNOVATIVE** and **REUSABLE FACE** mask with exciting features.

It is built for those who cares for their Health and Protection of others. We made it possible to Overcome Limitations that regular face mask caused so far.

 **GLASK**[®]

is designed based on researches conducted by **Our engineers** and **Limitations** any regular face mask has caused so far.

It helps you to **Breathe Easier, Safer** and **Allows** you to communicate better and clear.

 **GLASK**[®]

**AIR
FILTRATION**
POWERED BY
**ELECTRONIC
SENSORS**

Face masks **MUST PROVIDE** a **MEDICALLY APPROVED** filtration mechanism (e.g. N95 filters). Most face masks you see every day do not have any standards.

Glask features up to 5 layers including HEPA – Carbon Active filters along with additional filters to ensure maximum (almost 99%) protection. It also come with dual valve air channels.

A woman with blonde hair, wearing a white tank top and black leggings, is crouching in a gym. She is wearing a purple GLASK face mask that covers her nose and mouth and has a clear window for her eyes. She is holding a black kettlebell with both hands. The background shows a gym with large windows, a blue punching bag, and wooden boxes.

 **GLASK**[®]
SEALED FOR
COMPLETE
PROTECTION

Most of normal and regular face masks do not cover and seal your face completely. The sealing solution in our mask will protect you when you wear **GLASK**.

 **GLASK**[®]
LONG-TERM
REUSABILITY

Disposals of masks are causing troubles to our planet and drains our bank account in long term. Researches proved that if you effectively want to protect yourself, you would spend 400-1000\$ a year on masks (and its disposals!)

We reached to a reusable and sustainable approach in designing our face mask that not only protects you well, also saves you money and saves our environment and resources.

STRAPLESS
DESIGN
 **GLASK**®

One major problem that often makes you take away your face mask is its annoying straps. **Glask** features an eyeglass-like design which gives you comfort in long run, also sits on your face very well.

ANTI-FOG FRONT GLASS

Regular face mask makes difficulties when you want to talk and communicate with others, especially for people with hearing problems.

It's a solution to give you a normal facial exposure as well as showing your smile and expressions.

COMES WITH MICROPHONE & LOUDSPEAKER

Teachers, University Professor, Journalist and those who actively talk in public or communities need a solution to get their **voice CLEARLY** to their audience.

Glask features a loudspeaker mechanism to amplify your voice, so you would talk clearer than ever!

GLASK[®]
**SUSTAINABLE
DESIGN**

Each day plenty of disposed masks go into the oceans and threaten our planet and natural resources. **Glask** is designed to cut those disposals and save our resources and manufacturing capabilities at the same time!

A WIN-WIN STRATEGY!

**BLUETOOTH
COMMUNICATION**
(BONE CONDUCTION EARBUDS)

 **GLASK**[®]

Ever needed to take off your mask to answer a phone call?

The bone conduction earbuds inside the **Glask** will do the job. Keep your mask on and answer your calls with a single touch of a button!

LI-ION RECHARGEABLE BATTERY

The rechargeable Li-Ion Battery will keep your
Glask's features alive during the day.

YOUR DESIRED MATERIALS, LOOKS AND FEATURES.

GLASK'S ELECTRONIC FAN MECHANISM FOR ENHANCED AIR FLOW

GLASK provides a smart fan technology for effortless breathing for different occasions. This technology includes a small, powerful and quiet fan that is controlled by an implemented tiny air pressure sensor. The sensor monitors breathing cycle of the person and air pressure inside the mask; and sends data to the fan, which adjusts its speed to provide more/less airflow into the mask. The fan can be adjusted between 3-5 speeds according to the body demand of the person wearing the Glask

SCENTED FILTERS

SOMETIMES OUR OWN BREATH SMELLS UNPLEASANT. TRY OUR NATURALLY SCENTED FILTERS TO GIVE YOU JOY AND COMFORT WHILE WEARING YOUR FAVORITE MASK!

FILTERING MECHANISM

1. Non – woven layer

Filters large particles, provides a partial barrier to virus-containing droplets

2. HEPA filter

HEPA filters remove 99.97% of contaminants in the air that are 0.3 microns in size. HEPA filters are capable of capturing such small particles such things as bacteria, mold, dust mites and pollen.

3. Hydrophobic layer

Blocks water, blood and body fluids such as sweat or spit

4. Carbon active filter

Filters out odors, bad smells, smoke, fumes and other chemicals.

5. Antibacterial filter paper

traps and neutralizes pathogenic microorganisms using wood fibers
